Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant argues that Katzir does not disclose "a data rate that is higher than the pulse repetition rate". Examiner's maintains that this limitation is disclosed by Katzir (e.g. claim 37). In his response, Applicant will discuss distinctions between the instant invention and Katzir which allow the instant invention, and not Katzir, to "deliver the modulated light pulse by pulse to different spatially overlapping regions" Line "33" of Katzir is not scanned continuously in the X-direction (Fig. 2B). Examiner's will reconsider Applicant's arguments upon receipt of the response .
